Agency Name		
Air Resources Board		
Subject Matter: Staff will present for Board consideration proposed amendments to the existing regulations that require emission reductions from auxiliary engines for ocean going vessels while at-berth. These amendments will address specific compliance concerns, clarify regulatory language, and maintain existing emission reduction requirements. Additionally, the amendments aim to expand the At-Berth regulation to include smaller fleets and/or additional vessel types. The amendments may require new equipment and changes to existing infrastructure.	**CCR Title & Sections Affected:** Title 17, § 93118.3	**Statute(s) or Court Decision(s) Being Implemented:** Health & Saf. Subject Matter: The proposed amendments to regulations regarding procedures to certify and test vapor recovery systems used at gasoline dispensing facilities (GDF or gas stations). The certification systems include in-station diagnostics (ISD) similar to on-board diagnostic on cars that provide warning to gas station operators when there is high likelihood of vapor recovery equipment failures so repairs can be carried out expeditiously. Staff will propose a number of station- and vehicle-specific solutions to address ISD nuisance overpressure alarms that are experienced by GDFs primarily during periods when winter gasoline is sold (typically between November and March).
