LEGISLATIVE COUNSEL'S DIGEST

Bill No.

as introduced, _____.

General Subject: Transportation.

Existing law, the Road Repair and Accountability Act of 2017, establishes a comprehensive transportation funding program by increasing fuel taxes and imposing certain vehicle fees. Existing law provides for certain of the new revenues to be deposited in the Road Maintenance and Rehabilitation Account, the Public Transportation Account, or the State Highway Account to be used for specified transportation purposes. Existing law imposes various duties on the Controller in that regard. Existing law also imposes various duties on the Controller with respect to administration of the State Transit Assistance Program.

This bill would modify certain duties of the Controller relative to the Road Maintenance and Rehabilitation Account and the State Transit Assistance program. The bill would also correct a number of erroneous cross-references and make other nonsubstantive changes.

The Road Repair and Accountability Act of 2017 continuously appropriates \$200,000,000 annually from the Road Maintenance and Rehabilitation Account for allocation by the California Transportation Commission to counties that have sought and received voter approval of taxes or that have imposed certain fees, which taxes or fees are dedicated solely to transportation improvements.

This bill would instead refer to local or regional transportation agencies rather than counties. The bill would provide that funds made available to those transportation agencies by the California Transportation Commission may be used for other transportation improvement projects in addition to road maintenance and rehabilitation. By modifying the agencies eligible for an allocation of these funds and the authorized purposes for which these funds may be used, the bill would thereby make an appropriation.

Existing law prohibits a person from driving, moving, or leaving standing upon a highway any motor vehicle, as defined, that has been registered in violation of provisions regulating vehicle emissions.

Existing law, beginning January 1, 2020, requires the Department of Motor Vehicles to confirm, prior to the initial registration or the transfer of ownership and registration of a diesel-fueled vehicle with a gross vehicle weight rating of more than 14,000 pounds, that the vehicle is compliant with, or exempt from, applicable air pollution control technology requirements, pursuant to specified provisions. Existing law requires the department to refuse registration, or renewal or transfer of registration, for certain diesel-fueled vehicles, based on weight and model year, that are subject to specified provisions relating to the reduction of emissions of diesel particulate matter,

oxides of nitrogen, and other criteria pollutants from in-use diesel-fueled vehicles. Existing law authorizes the department to allow registration, or renewal or transfer of registration, for any diesel-fueled vehicle that has been reported to the State Air Resources Board, and is using an approved exemption, or is compliant with applicable air pollution control technology requirements, pursuant to specified provisions.

Existing law authorizes the department, in its discretion, to issue a temporary permit, for a fee of \$50, to operate a vehicle when a payment of fees has been accepted in an amount to be determined by the department and paid to the department by the owner or other person in lawful possession of the vehicle. Existing law also authorizes the department to issue a temporary permit to operate a diesel-fueled vehicle for which registration is otherwise required to be refused.

This bill would exempt the diesel-fueled vehicles issued a temporary permit from payment of the \$50 fee.

Existing law imposes a vehicle improvement fee under the Vehicle License Fee Law, but exempts certain vehicles from payment of the fee, including commercial vehicles with an unladen weight of more than 10,000 pounds.

This bill would also exempt a vehicle issued apportioned registration pursuant to the International Registration Plan from payment of the fee.

Existing law defines “zero-emission vehicle” for purposes of the road improvement fee imposed by the Road Repair and Accountability Act of 2017 on zero-emission vehicles.

This bill would revise the definition of zero-emission vehicle to exclude from the definition any other motor vehicle that is able to operate on any fuel other than

gasoline or diesel fuel. The bill would also exempt from the fee a vehicle issued apportioned registration pursuant to the International Registration Plan.

Existing law provides that guidelines adopted to implement transportation programs pursuant to the Road Repair and Accountability Act of 2017 by the California Transportation Commission, the Department of Transportation, the Transportation Agency, or any other state agency shall be exempt from the Administrative Procedure Act.

This bill would require any guidelines of the Department of Transportation or the Transportation Agency to implement the Road Repair and Accountability Act of 2017 to be adopted only after the implementing state agency has posted formal draft guidelines on the agency's Internet Web site and conducted at least 2 public workshops or hearings on formal draft guidelines no sooner than 30 days after the formal draft guidelines are posted. The bill would also require the implementing state agency to transmit the formal draft guidelines to the fiscal committees and to the appropriate policy committees of the Legislature.

This bill would declare that it is to take effect immediately as a bill providing for appropriations related to the Budget Bill.
