

RESOLUTION NO. OB 17-13

A RESOLUTION OF THE LANCASTER SUCCESSOR AGENCY
OVERSIGHT BOARD APPROVING A LONG RANGE PROPERTY
MANAGEMENT PLAN PREPARED PURSUANT TO
CALIFORNIA HEALTH AND SAFETY CODE SECTION 34191.5

WHEREAS, as authorized by applicable law, the City of Lancaster has elected to serve as the Successor Agency to the former Lancaster Redevelopment Agency; and

WHEREAS, Health and Safety Code Section 34191.5(b) requires a successor agency to prepare a long-range property management plan to address the disposition and use of the real property of the former redevelopment agency; and

WHEREAS, the Successor Agency has prepared a proposed long-range property management plan ("Plan") in accordance with Health and Safety Code Section 34191.5 with regard to the disposition of the former Redevelopment Agency's non-housing property ("Property") identified and listed in the plan, and a copy of the Plan is attached to this Resolution as Exhibit "A"; and

WHEREAS, the Lancaster Successor Agency Oversight Board has received and reviewed the Plan at its regular meeting of July 16, 2013 and considered the Plan at its special meeting of August 13, 2013; and

WHEREAS, the Lancaster Successor Agency Oversight Board finds that the Plan was prepared in accordance with the requirements of Health and Safety Code Section 34191.5.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED AND ORDERED BY THE LANCASTER SUCCESSOR AGENCY OVERSIGHT BOARD, AS FOLLOWS:

1. The Lancaster Successor Agency Oversight Board finds and determines that The Long-Range Property Management Plan attached to this Resolution as Exhibit "A" is hereby approved.
2. Successor Agency Staff is hereby authorized and directed to transmit the approved Plan and this resolution to the Department of Finance for review and approval in accordance with the requirements of Health and safety Code Section 34191.5.
3. The Executive Director is hereby authorized and directed to take all actions necessary to implement The Long-Range Property Management Plan, subject to Successor Agency Board approval of each Property transfer.

PASSED, APPROVED and ADOPTED this 13th day of August, 2013, by the following vote:

AYES: Board Members: Brewington, Levin, Smith, Vose, Vice Chair Vierra, Chair Brubaker

RESOLUTION NO. OB 02-14

A RESOLUTION OF THE LANCASTER SUCCESSOR AGENCY OVERSIGHT BOARD REVISING THE LONG RANGE PROPERTY MANAGEMENT PLAN PREPARED PURSUANT TO CALIFORNIA HEALTH AND SAFETY CODE SECTION 34191.5

WHEREAS, as authorized by applicable law, the City of Lancaster has elected to serve as the Successor Agency ("Successor Agency") to the former Lancaster Redevelopment Agency ("Former Redevelopment Agency"); and

WHEREAS, Health and Safety Code Section 34191.5(b) requires a successor agency to prepare a long-range property management plan to address the disposition and use of the real property of the former redevelopment agency; and

WHEREAS, the Successor Agency has prepared a proposed long-range property management plan ("Plan") in accordance with Health and Safety Code Section 34191.5 with regard to the disposition of the Former Redevelopment Agency's non-housing property ("Property") identified and listed in the Plan, a copy of which is attached hereto as Exhibit "A" and incorporated herein; and

WHEREAS, the Oversight Board received and reviewed the Plan at its regular meeting of July 16, 2013, and thereafter approved the Plan at its special meeting of August 13, 2013; and

WHEREAS, the Department of Finance completed its review of the Plan on December 23, 2013, and indicated the need for language related to compensation agreements with the other taxing entities.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED AND ORDERED BY THE LANCASTER SUCCESSOR AGENCY OVERSIGHT BOARD, AS FOLLOWS:

1. The Plan shall be and hereby is revised and amended to include the following provision:

For all properties the City wishes to retain for future development, the City shall reach compensation agreements with the other taxing entities pursuant to Health and Safety Code Section 34180(f)(1).

2. Except as and to the extent provided in Section 1 of this Resolution, the Plan shall remain in full force and effect as written.

3. Subject to applicable law, the Executive Director is hereby authorized and directed to take all actions necessary to dispose of Property according to the Plan.

4. The Clerk of the Oversight Board shall certify to the passage and adoption of this Resolution, and it shall become effective immediately upon its approval.

PASSED, APPROVED, and ADOPTED this 7th day of January, 2014, by the following vote:

RESOLUTION NO. OB 04-14

A RESOLUTION OF THE LANCASTER SUCCESSOR AGENCY OVERSIGHT BOARD REVISING THE LONG RANGE PROPERTY MANAGEMENT PLAN PREPARED PURSUANT TO CALIFORNIA HEALTH AND SAFETY CODE SECTION 34191.5

WHEREAS, as authorized by applicable law, the City of Lancaster has elected to serve as the Successor Agency ("Successor Agency") to the former Lancaster Redevelopment Agency ("Former Redevelopment Agency"); and

WHEREAS, Health and Safety Code Section 34191.5(b) requires a successor agency to prepare a long-range property management plan to address the disposition and use of the real property of the former redevelopment agency; and

WHEREAS, the Successor Agency has prepared a proposed long-range property management plan ("Plan") in accordance with Health and Safety Code Section 34191.5 with regard to the disposition of the Former Redevelopment Agency's non-housing property ("Property") identified and listed in the Plan; and

WHEREAS, the Oversight Board received and reviewed the Plan at its regular meeting of July 16, 2013, and thereafter approved the Plan at its special meeting of August 13, 2013; and

WHEREAS, the Department of Finance completed its review of the Plan on December 23, 2013, and indicated the need for language related to compensation agreements with the other taxing entities; and

WHEREAS, the Oversight Board approved Resolution OB 02-14 at its special meeting of January 7, 2014, revising the long-range property management plan adding language related to compensation agreements with the other taxing entities; and

WHEREAS, upon further review the Department of Finance approved the long-range property management plan with the exception of twenty-one (21) properties listed as Downtown Parking to be transferred to the City for government use pursuant to Health and Safety Code Section 34181(a); and

WHEREAS, the Department of Finance has indicated those properties (listed in Attachment A) should be disposed of in a manner other than transfer for government use.

NOW, THEREFORE, BE IT RESOLVED, DETERMINED AND ORDERED BY THE LANCASTER SUCCESSOR AGENCY OVERSIGHT BOARD, AS FOLLOWS:

1. The Plan shall be and hereby is revised and amended to include the following provision:

For the twenty-one properties listed in Attachment A, the disposition plan is to be amended to change from transfer to government pursuant to Health and Safety Code Section 34181(a) to retain for development pursuant to Health and Safety Code Section 34191.5(c)(2)(A).

2. Except as and to the extent provided in Section 1 of this Resolution, the Plan shall remain in full force and effect as written and amended by Resolution OB 02-14.

3. Subject to applicable law, the Executive Director is hereby authorized and directed to take all actions necessary to dispose of Property according to the Plan.

4. The Clerk of the Oversight Board shall certify to the passage and adoption of this Resolution, and it shall become effective immediately upon its approval.

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

Transmittal Memo

Subject: Long Range Property Management Plan

Honorable Chair and Members of the Oversight Board:

Assembly Bill 1484 was signed into law on June 27, 2012 to address issues and ambiguities arising from the implementation of Assembly Bill x1 26, signed on June 28, 2011. AB 1484 not only provides clarification regarding the legislation that eliminated redevelopment, but also imposes several new obligations on both successor agencies and oversight boards.

AB 1484 added Section 34191.5 to the Health and Safety Code (H&S), which requires a Successor Agency to prepare a Long Range Property Management Plan that identifies all Successor Agency real estate assets and a designation for the disposition of each asset. This document is the Long Range Property Management Plan (LRPMP) for the Successor Agency to the former Lancaster Redevelopment Agency (RDA) called for in AB 1484. The LRPMP is a planning document subject to future implementation of its terms upon approval of specific property transfers by the Board of Directors of the Successor Agency.

The Lancaster Successor Agency is responsible for 367 parcels. Development of these parcels has historically not occurred by, and will not occur by, private enterprise alone. For these very small and frequently land-locked, unimproved parcels, time is of the essence for the City to have the ability to plan for and/or dispose of specified properties for tax-base enhancing and job-creating development opportunities. Market forces and property conditions require the City's involvement in negotiations with prospective developers. Absent such involvement, the properties would remain vacant, generating nominal enhancements in property tax revenues for the taxing agencies and, in turn, the State of California under Proposition 98 (1988).

The City of Lancaster must continue to play a business-friendly role in solving the myriad development issues created by the poorly timed and illogical subdivision of these parcels that has occurred throughout the City's history. This is particularly true for vacant properties, where the economic value of one-time sale proceeds pales in comparison to the net present value of the annual property tax revenues the taxing entities will receive if and when properties are redeveloped and reassessed.

Sincerely,

Mark Bozigian
Executive Director

Background and Purpose

This Long-Range Property Management Plan (the “Plan”) has been prepared and will be processed by the Successor Agency (the “Successor Agency”) for the Lancaster Redevelopment Agency (the “Former Redevelopment Agency”) in accordance with H&S Section 34191.5.

The Former Redevelopment Agency was dissolved on February 1, 2012, and the non-housing related real property of the Former Redevelopment Agency (the "Property") was transferred to the Successor Agency. The Successor Agency is now responsible for disposition of the Property in accordance with the procedures and requirements of ABx1 26 and AB 1484 (the “Redevelopment Dissolution Statutes”), the statutes that govern the dissolution of the Former Redevelopment Agency and the liquidation of its former property.

This Plan will be reheard by the Oversight Board and the Successor Agency on August 13, 2013.

If approved by the Oversight Board and Successor Agency, the action will then be relayed to the California Department of Finance (the “DOF”) for its approval.

This Plan will become effective upon the completion of all of the following: (1) approval of the Plan by the Oversight Board and Successor Agency; (2) approval of the Oversight Board Action by the DOF; and (3) issuance of a Finding of Completion by the DOF to the Successor Agency in accordance with H&S Section 34179.7.

In accordance with H&S Section 34191.5(c), the following sections of this Plan consist of an inventory of specified information, required components related to the Property, and the designated disposition of the Property.

Required Components

Pursuant to H&S Section 34191.5 et seq., the Plan shall include all of the following (“Required Components”):

1. An inventory of all properties in the Trust (“Asset Inventory”).
2. The inventory for each parcel shall consist of all of the following information:
 - a. The date of acquisition of the property and value/purchase price of the property at that time.
 - b. The purpose for which the property was acquired.
 - c. Parcel data, including address, lot size, and current zoning in the former agency redevelopment plan or specific, community, or general plan.

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

- d. An estimate of the current value of the parcel including, if available, any appraisal information.
 - e. An estimate of any lease, rental, or any other revenues generated by the property, and a description of the contractual requirements for the disposition of those funds.
 - f. The history of environmental contamination, including designation as a brownfield site, any related environmental studies, and history of any remediation efforts.
 - g. A description of the property's potential for transit-oriented development and the advancement of the planning objectives of the successor agency.
 - h. A brief history of previous development proposals and activity, including the rental or lease of property.
3. Address the use or disposition of all of the properties in the Trust. Permissible uses authorized under AB 1484 include: 1) the retention of the property for governmental use pursuant to subdivision (a) of Section 34181; 2) the retention of the property for future development; 3) the sale of the property; or 4) the use of the property to fulfill an enforceable obligation. The plan shall separately identify and list properties in the trust dedicated to governmental use purposes and properties retained for purposes of fulfilling an enforceable obligation. All of the following conditions shall apply:
- a. If the Plan directs the use or liquidation of the property for a project identified in an approved redevelopment plan, the property shall transfer to the city, county, or city and county.
 - b. If the Plan directs the liquidation of the property or the use of revenues generated from the property, such as lease or parking revenues, for any purpose other than to fulfill an enforceable obligation or other than that specified in subparagraph (a), the proceeds from the sale shall be distributed as property tax to the taxing entities.
 - c. Property shall not be transferred to a successor agency, city, county, or city and county, unless the long-range property management plan has been approved by the Oversight Board and the California Department of Finance.

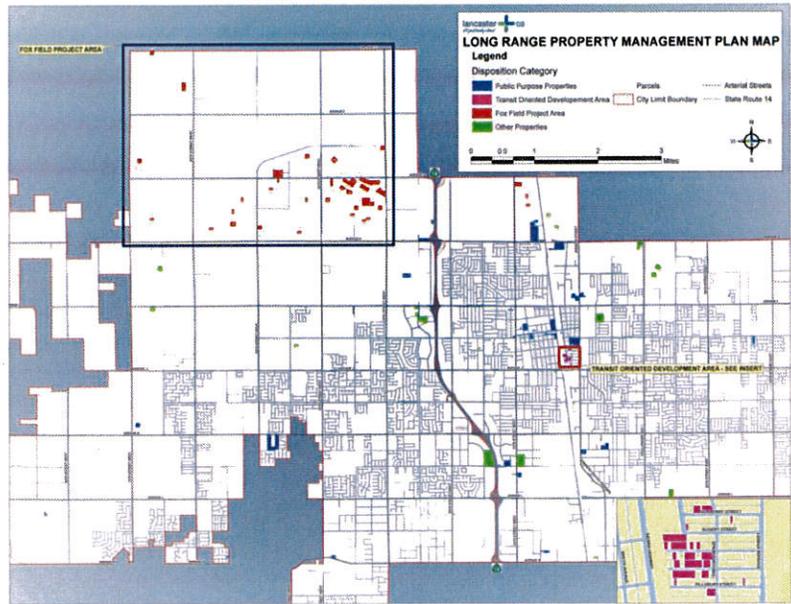

Disposition Process

Approval and Application of the Plan

1. Present the Plan to the Oversight Board for review.
2. Present the Plan to the Successor Agency for approval.
3. Present the Plan to the Oversight Board for approval.
4. Submit the Oversight Board Action to the California Department of Finance for approval.
5. Transfer properties for governmental purposes to the City of Lancaster, where applicable.
6. Transfer properties for economic development activities to the City of Lancaster, where applicable.
7. Sell assets in the open market, where applicable.

Summary of Asset Designations

Type of Property	Total Acres	Number of Parcels	Designation
Public Purpose			
Public Use Assets: City Hall, Parking lots, drainage basins, roads, right-of-way, etc.	131.74	203	Transfer to City to Retain for Continued Public Use
Fox Field Specific Plan Area	124.38	43	Transfer to City to Retain for Future
Transit Oriented Development Area	5.69	98	Public Improvements and Development
Other Parcels from Redevelopment Projects			
Revitalizing Commerce - Amargosa and Area #5	36.13	6	Transfer to City to Retain for Future
Lancaster Power Authority Solar Project	9.29	1	Public Improvements and Development
Front Row Center	9.03	4	
Resale Properties	18.59	12	Liquidate to Enforceable Obligations
Total	334.86	367	

Asset Designation Narratives

Each asset in this Long Range Property Management Plan (LRPMP) has a designated disposition. For example, the Lancaster Performing Arts Center is designated to be transferred to the City of Lancaster for continued public use. The following narratives provide the history and the reasoning behind each parcel's designation. The LRPMP is a planning document subject to future implementation of its terms upon approval of specific property transfers by the Board of Directors of the Successor Agency.

Because many of the assets have very similar histories and designated dispositions, they were grouped into the following categories. The reasoning behind each parcel's designation is explained by category.

1. Public Purpose
2. Fox Field Industrial Corridor
3. Transit Oriented
4. Other

Public Purpose Properties Narrative

Recommendation

Transfer Public Purpose Properties to the City of Lancaster, the sponsoring entity and appropriate public jurisdiction, so that the properties may be used for continued public use per H&S Section 34181 (a).

Background

Lancaster's population and residential development rapidly expanded in the 1980s. Numerous residents from the Greater Los Angeles Basin moved to Lancaster to find refuge from high home prices in the more impacted areas of Los Angeles. The market at the time demanded cheap land, and Lancaster had plenty available. However, due to this rapid expansion, the City lacked the civic improvements necessary to provide superb government services to the growing population. Local leadership and the Redevelopment Agency resolved to fix this problem.

The Lancaster Redevelopment Agency was deeply involved in the construction of civic improvements in the City of Lancaster. In 1992, an agreement was developed and signed between the County of Los Angeles, the Consolidated Fire Protection District of Los Angeles County, the Los Angeles County Public Library, the Los Angeles County Office of Education, the City of Lancaster, and the Lancaster Redevelopment Agency that established cooperation in developing a number of government buildings. This agreement marked the beginning of a series of property acquisitions and construction activity.

Conclusion

According to H&S Section 34181 (a), "the Oversight Board may instead direct the successor agency to transfer ownership of those assets that were constructed and used for a governmental purpose...to the appropriate public jurisdiction..." The asset inventory contains 203 parcels that were constructed and used for a governmental purpose. A large portion of those parcels are drainage basins (104 in all). Additional examples of parcels designed for public use include City Hall, the Lancaster Performing Arts Center, the Lancaster Sheriff's Station, and the Lancaster Maintenance Yard. Because each parcel was constructed and used for a government purpose, this group of parcels should be transferred to the City of Lancaster for continued public use.

Fox Field Industrial Corridor Narrative

Recommendation

Transfer properties to the City of Lancaster for continued development. The Oversight Board should allow the City of Lancaster, the sponsoring entity, to retain real assets located in the Fox Field Industrial Corridor to maximize value by eliminating blight through the construction of public improvements and assembly of irregular parcels for the purpose of facilitating development that will result in maximum sales prices for these properties. For three decades, all of the development that has occurred in the Fox Field Specific Plan area has taken place due to action by the former Redevelopment Agency. In the event the City were to determine that it will not retain the Fox Field Industrial Corridor properties for future development, any sale would be brought back to the Oversight Board for approval.

Background

The Fox Field Industrial Corridor Project is an unfinished business/industrial park located in the northwest portion of the City of Lancaster. As illustrated in the Fox Field Specific Plan and numerous redevelopment planning documents, the Corridor is envisioned by the City of Lancaster and the County of Los Angeles as an employment corridor that will create substantial jobs and economic benefit while also protecting the ongoing operation of the County-owned general aviation airport. Shortly after the City incorporated on November 22, 1977, the City annexed the airport and surrounding areas into the corporate limits of the new community. This action was taken to protect the operation of the airport and to end the residential encroachment that had plagued it for many years. Once the annexation was approved, the City took the action of enacting a Specific Plan that eliminated the offending residential zoning and established a plan to foster job creation and encourage modern industrial parks.

The concept of an intergovernmental planning effort in this area was proposed in a 1982 letter to the County of Los Angeles from Lancaster's City Manager. In their response, the County expressed a desire to maximize the region-wide gains from any development effort; a willingness to continue discussions with the City; and an overall lack of opposition to the City's proposed Fox Field Redevelopment Project. The Redevelopment Project was subsequently adopted by the City in 1982.

Multiple agencies, including the City of Lancaster, the former Redevelopment Agency, the Lancaster Economic Development Corporation (no longer operating), the County of Los Angeles, and Los Angeles County Economic Development Corporation have expressed continued interest in the development of the area, with the following goals:

- Expanding and improving the airfield;
- Developing excess properties for both aviation-related and non-aviation uses;
- Promoting the industrial development of the Corridor and the concurrent expansion of the job market.

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

In 1990, a cooperative agreement was signed between the City; the County; the LACEDC; and the LEDC.

Since 1982, four main strategic planning documents have been developed:

- 1.) The City of Lancaster General Plan
- 2.) The Lancaster Redevelopment Agency Fox Field Project Plan
- 3.) The Five-Year Implementation Plan
- 4.) The Fox Field Specific Plan

These plans have set forth the blueprint for development of the Fox Field Industrial Corridor. Efforts to implement these plans have attracted several distribution centers that have each substantially increased property values while benefitting the community. Each distribution center has created and sustained hundreds of jobs, including Rite Aid (750,000 square feet); Michaels (735,000 square feet); and Sygma (210,000 square feet). The National Guard and Larwin Commercial have also developed buildings, further increasing property values and creating still more jobs for local workers. None of these projects would have occurred had the former Agency not provided infrastructure and facilitated the land transactions.

Although great progress has been made in the economic development of this area, many land-related issues remain. The most significant problem is that the area was subdivided prior to the City's incorporation in 1977 to over 3,000 parcels that are substantially land-locked and lack any basic infrastructure. The average lot size is 1.25 acres, and the ownership is located literally all over the world, as much of this property was sold in Asia to unsophisticated buyers who frequently closed escrow sight-unseen.

Over the years, the former Lancaster Redevelopment Agency (LRA) acquired several of these properties in an attempt to assemble a viable site for future job-creating development, which would in turn maximize the long-term revenue generation potential of these properties for the taxing agencies. The City is currently working on such a deal and will use the previously acquired parcels to exchange for the targeted properties. The large transactions for the major employers mentioned previously return substantially more in property and other taxes and economic benefit through job creation to the taxing entities than the sale of an undervalued, land-locked desert parcel possibly could.

Problem Summary

Irregular parcelization and lack of infrastructure are persistent issues in the Fox Field Industrial Corridor that consistently hinder the viable use of vacant lots. As a result, property values have depreciated significantly. The area has not realized its potential and will fail to do so in the future unless further public-private partnerships are created to maximize property values and the resulting revenues to the taxing entities.

For the past 30 years, the LRA has been instrumental in mitigating the problems that had previously prohibited development in the Fox Field Industrial Corridor. The LRA's involvement took the form of attracting major distribution firms such as Rite Aid, Michaels, and Sygma; expanding Avenue G to a six-lane arterial roadway; and creating a new, regional Antelope

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

Valley Fairgrounds. The LRA's involvement in the Fox Field Industrial Corridor has created 1,165 jobs for local workers.

In addition, the LRA attracted a small industrial and office park which is home to several small businesses, including Griffin Industries, Swiss Mechanics, and at one point in time, SC Gaskets. But for the LRA's intervention in the Fox Field Industrial Corridor, none of these employers would have expanded into Lancaster.

Presently, the City is in negotiations with several businesses that have the potential to substantially improve the property values and, by extension, revenue generated to the taxing agencies in Fox Field. Absent government involvement, it is highly unlikely that the Fox Field Industrial Corridor will attract further development and realize its full potential as a job-creating, tax revenue-generating economic corridor.

Employers in the Fox Field Industrial Corridor

Company	Employees
Michael's	250
Rite-Aid	673
SYGMA	242
Total	1,165

Goals and Accomplishments

The Preliminary Plan for the Project was formulated and approved by the Lancaster Planning commission on August 9, 1982.

The primary goal of the Project was to assist in the redevelopment of areas which are presently stagnant and unproductive. Many of the parcels throughout the area had remained undeveloped for many years, while others exhibited a complete or growing lack of productive utilization.

Property Values in the Fox Field area are low due to the existence of inadequate public improvements, public facilities, tended open spaces, and utilities which cannot be remedied by private or governmental action without public-private partnerships. Cohesive development of these parcels will generate far greater revenue to the taxing agencies than they would receive if the properties remain undeveloped.

The Redevelopment Agency acquired land in the Fox Field Area over the past 20 years as a concerted effort to reverse blighting conditions. Irregular parcelization and poor traffic circulation have historically deterred private investment in the area, leading to further physical and economic stagnation. As such, past efforts to solicit development interest in the Fox Field Industrial Corridor have been unsuccessful without some form of subsidy. The successes of the relocation of Rite-Aid, Michaels, and Sygma distribution centers to the Fox Field Corridor prove that there is sufficient market demand to support future uses. However, disposition of the property without economic incentives (e.g., land write-down) is not viable unless it is sold at a discounted price, which would result in minimal one-time sale proceeds. Due to anticipated

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

inability to develop these sites, ongoing property tax revenue streams to affected taxing entities would be minimal when based on the reassessment of the property at a discounted sales price.

The Specific Plan specifies four primary goals which served as the driving force behind the actions taken in the Fox Field Industrial Corridor. They are as follows:

1. Provide adequate infrastructure (water, wastewater, and drainage) to support the specific plan land uses.
2. Provide for the efficient movement of goods and people throughout the project area, establishing adequate access to individual land uses.
3. Provide for effective access to the future fairgrounds while coordinating with the enhanced circulation system for the project, thus providing multiple points of access for the future fairgrounds.
4. Establish landscaped corridors into the project, utilizing the regional arterials to establish a project theme as well as to identify and enhance the City's image.

The five-year implementation plan is similar. It includes five "development actions" to eliminate blight which, in summary, provide that the Agency:

1. Install, construct, reconstruct, redesign, or reuse public improvements
2. Acquire and dispose of real property
3. Redevelop land by private enterprise or public agencies
4. Finance private development as permitted by law to increase employment opportunities in the City
5. Rehabilitate structures or develop vacant land by present owners and the Agency

Property was acquired by the Redevelopment Agency in the Fox Field Industrial Corridor with the intention of contributing to the development of public improvements. According to Sec. 401 of the Redevelopment Plan for the Fox Field Redevelopment Project, the Agency's first strategy to combat blight and deterioration in the Fox Field Industrial Corridor was to acquire land for the "Installation, construction, reconstruction, redesign, or reuse of streets, utilities, curbs, gutters, sidewalks and other public improvements."

The following section will explore how achieving these goals can induce growth in the area and benefit all taxing agencies.

The Growth-Inducing Impact

Construction of public improvements and the acquisition of property for said improvements were the product of careful planning. An analysis by Urban Futures Inc. for the Fox Field Redevelopment Project concluded that successful implementation of the Fox Field Plan and construction of public improvements would directly and indirectly foster economic and population growth in the community. The plan indirectly encourages economic growth through the establishment of physical improvements and parcelization that lends itself to easier development. In turn, the growth of the region will induce an increase in taxing values which will benefit the taxing agencies, including local school districts, the County of Los Angeles, and the State of California. As stated in the redevelopment plan itself:

LONG RANGE PROPERTY MANAGEMENT PLAN

For the Disposition of Real Property of the Lancaster Successor Agency

August 7, 2013

“Implementation of the proposed Plan will result in a more attractive and healthful community in which to work. This in itself may be a stimulus to further growth. The addition of new commercial/industrial facilities will help to broaden the tax base, thereby improving both municipal and school district revenues. Additional commercial/industrial development will also increase available employment in the community. The increased availability of employment is desirable economically, resulting in providing jobs to the unemployed residents of the City.

“A major factor restricting growth and development within the Project Areas are the lack of necessary public improvements, such as sewer service; water service; flood control facilities; street improvements; and related public services. The adoption and subsequent implementation of the Redevelopment Plan will result in these facilities being installed. The installation of such improvements will substantially induce the future growth of the Project Areas. A primary reason for redevelopment of the Project Area is to induce and encourage growth in the Project Areas consistent with the City’s General Plan.”

Conclusion

Continued public involvement is needed to ensure the maximum benefit to taxing agencies from the ultimate sale of properties in the Fox Field Industrial Corridor. As demonstrated by the fact that the Agency played a pivotal role in attracting all of the corridor’s major employers, the private sector is unwilling or unable to spend the time and capital required to assemble viable industrial sites in this area. However, with the involvement of the public sector, this area is capable of generating significant tax revenue and employment opportunities. This is of particular importance to the Lancaster community, which has a current unemployment rate above 13% and will soon experience the loss of an additional 1,600 jobs, as Bank of America will soon close its call center in the Lancaster Business Park. Bank of America is currently Lancaster’s second-largest employer.

Section 35 of AB 1484 amends section 34191 of the Health and Safety Code to give Oversight Boards the authority to approve a long range property management plan that yields to the sponsoring entity real property assets of the Successor Agency. In this case, the City of Lancaster is the sponsoring entity. City retention of the Fox Field properties would permit ongoing site control and access to promote parcel development and reorganization, thus benefitting the local community while also generating significantly increased revenue to the taxing agencies by increasing the assessed value of the properties. This is particularly true for vacant properties where the economic value of a one-time sale in a down market pales in comparison to the net present value of the ongoing annual property tax revenues the taxing entities will receive when the properties are redeveloped and reassessed.

Thus, consistent with ABX1 26 and AB 1484, H&S Section 34177 (e), to maximize the value of Agency property and, hence, maximize future property tax revenues to affected taxing entities, the Successor Agency should allow the City to retain Fox Field properties for the continued elimination of blight, construction of public improvements, assembly of irregular parcels, and the creation of jobs in the Fox Field Corridor. This action would provide tax agencies with a maximum benefit as property is reassessed at a significantly higher rate after improvements, thereby increasing the money allocated to the taxing agencies, including the State.

LONG RANGE PROPERTY MANAGEMENT PLAN
 For the Disposition of Real Property of the Lancaster Successor Agency
 August 7, 2013

Addendum Fact Sheet

Adoption Date:	December 20, 1982	Ordinance No.	289
Amendment Date:	December 5, 1994 August 21, 1995 October 26, 1999 June 22, 2004	Ordinance No. Ordinance No. Ordinance No. Ordinance No.	671 708 770 830
Term of Plan:	2023 (41 Years, per SB 1045)	Base Year:	1982-1983
Total Area:	3,290 Acres	Sub Area:	2 noncontiguous area
Base Year Assessed Value:	\$14,988,305	2012-2013 Assessed Value:	\$ 213,277,390

The Fox Field Fact sheet above delineates the increase in assessed value over the time of the project. From the base year to the current assessment, the value has increased by approximately \$200 million. This exponential increase in value is a testament to the capacity of local government to create value not only for local residents, but also for the taxing agencies. As this increase is a direct result of the Agency's actions in the Fox Field Industrial Corridor, it is highly probable that were the City given more time to assemble parcels, expand right-of-way, increase circulation, and eliminate obstacles to development, the assessed value would continue to exponentially increase and thus substantially benefit all of the aforementioned taxing agencies.

Transit-Oriented Development Narrative: Southeast Transit Village

Recommendation

Transfer real assets located in the Southeast Transit Village Area (STVA) to the City of Lancaster to meet long-term needs for infrastructure improvements, the development of transit facilities and nearby transit-oriented development to revitalize the area, retention and appropriate expansion of the existing employment base, and the protection and enhancement of the major public and private investment made in the Lancaster downtown area immediately northwest of this area. In the event the City were to determine that it will not retain the STVA properties for future development, any sale would be brought back to the Oversight Board for approval.

Background

The Southeast Transit Village area, also known locally as the Herald Tract, has been a focus of Agency and City concern for several decades. The area was subdivided in the early 1900s into hundreds of small (25'x100') lots for the purpose of being given away as an incentive to take a subscription to the Los Angeles Herald newspaper. The result was an area with limited infrastructure and a gap-toothed development pattern. While some individuals were successful in assembling multiple parcels into a single development site and creating successful businesses, the subdivision and ownership pattern effectively prevented logical development of this area, despite its location in the center of the community immediately adjacent to the railroad station. Ultimately, the lack of significant development led to a perception of the area as undesirable, resulting in the location of marginal or unsightly uses mixed in with more successful enterprises.

This area is part of the Central Business District Redevelopment Area adopted by the City of Lancaster in 1981. Following adoption, the Agency worked to acquire parcels with the intent of assembling them into usable parcels for the development of light industrial uses in accordance with the adopted General Plan and zoning ordinance. The area immediately southwest of the intersection of Milling Street and Division Street was acquired and used for the development of a detention basin as part of an overall program to improve flood control in the area east of the railroad tracks. This detention basin is still in existence.

Property acquisition allowed for the creation of several development sites for industrial uses. Two trends began to change the long-term strategy for this area, beginning in January 1994 with the establishment of Metrolink Service with a temporary station in response to the Northridge earthquake. This was followed by the development of a permanent station at the present location by 1996. In 2001, the City's adoption of the North Downtown Transit Village Plan and the establishment in the General Plan of a Transit Village Planning Area, which encompassed much of the STVA, led to the emergence of transit-oriented housing and reinvestment in the downtown and north downtown area. This was further reinforced by the City's adoption of the Downtown Lancaster Specific Plan in 2008. In 2009, the STVA was redesignated as part of the City-wide General Plan revision to mixed-use, reflecting its proximity to the Metrolink Station and the City's intent to encourage additional transit-oriented development to augment the walkable,

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

bikeable, and transit-friendly reinvestment already taking place immediately to the west and northwest. The zoning for the STVA was changed from Light Industrial to Mixed-Use in 2010.

In 2012, the Southern California Association of Governments (SCAG) funded a vision planning effort, known as the Southeast Transit/Multi-Modal Transfer Facility Vision Plan, for the area under its Compass Blueprint program. This assistance is provided from SCAG to member agencies to facilitate planning and development efforts that align with and strengthen regional planning goals. This area is defined as a SCAG Opportunity Area due to the existence of the Metrolink Station and the downtown area, making it a prime location for further transit-oriented development. The planning process involved members of the community, property, and business owners within and proximate to the STVA, and resulted in a vision plan that describes long-term development approaches, street designs, and circulation/connectivity. This vision plan forms the basis for a Transit-Oriented Development (TOD) Overlay zone or similar regulatory device to establish a form-based code both on the STVA and the areas to the northeast and southwest of the Metrolink Station. The development of this form-based code is currently underway, funded by a grant from the Los Angeles County Metropolitan Transportation Agency, with the goal of adoption by mid-2014.

Goals and Accomplishments

The City of Lancaster has successfully revised the long-term strategy and approach for properties in the STVA by amending the General Plan to include it within a transit village planning area, adopting a mixed-use land use and zoning designation, and completing a vision plan to establish a framework for retention of existing viable businesses and attraction of new mixed-use and transit-oriented housing, commercial, and employment. The current work on the form-based, transit-oriented development code, which should be completed and adopted within a year, will further refine and strengthen long-term design and development control in this area.

The attraction of new housing into the STVA is a primary long-term goal for development of the area. Additional housing would assist in stabilizing the STVA by providing “round-the-clock” population presence and occupancy, additional population base to support transit and retail activity, and further bolstering the success of the downtown Lancaster revitalization immediately to the west. The planning efforts of the City over the last several years are establishing the basis for this long-term STVA development approach.

Conclusion

Despite the significant progress made in the STVA, the fragmented, small lot ownership pattern remains a significant impediment to effective and economically viable development in this area. The past 100 years of neglect, despite the affordability of these properties, demonstrates that the private sector is unwilling to spend the time and capital necessary to assemble this property or install necessary infrastructure. Returning such property with the current subdivision pattern to the private sector without adequate oversight and control perpetuates the fragmentation pattern that Agency ownership sought to alleviate through acquisition. It would represent a significant waste of taxpayer funds with no tangible results. Additionally, the transfer of these properties to the City would allow for the continuation of transit-oriented development, consistent with the

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

vision for this area set forth in the North Downtown Transit Village Plan and the City's General Plan. Finally, the sale of these properties to the private sector in a down market would generate substantially less revenue to the taxing agencies than if the parcels were retained by the City, assembled into viable sites, and developed. Thus, consistent with ABx1 26 and AB 1484, H&S Section 34177 (e), to maximize the value of Agency property and, hence, maximize future property tax revenues to affected taxing entities, the Successor Agency should allow the City to retain STVA properties.

Other Parcels from Redevelopment Projects

This category represents the parcels that were acquired for various redevelopment projects but have not yet been fully utilized to their highest and best use. These parcels are either blighted or are in the process of development and, as a result, require continued intervention from local government. There are a variety of reasons why development has not begun on these parcels. For most, it is due to current market conditions and a lack of interest from the private sector. The designated disposition for each is discussed below.

Revitalizing Commerce - Amargosa and Project Area 5

Recommendation

Transfer ownership of real assets located in Amargosa and Project Area 5 to the City of Lancaster for continued development, including the construction of public improvements, attraction of regional retail establishments, and job creation. Such development will substantially increase the revenue generated to the taxing agencies compared with the proceeds from a one-time sale coupled with the assessment of these properties under current market conditions. In the event the City were to determine that it will not retain the Amargosa and Project Area 5 properties for future development, any sale would be brought back to the Oversight Board for approval.

Background

Six (6) properties in this section were acquired for the purpose of revitalizing commerce, a primary goal of the Agency's Five-Year Implementation Plan. The first three are the two Amargosa Creek Channel properties and the auto mall expansion property. Two others, the Avenue M and Avenue L properties, were acquired for potential road expansions, as they were identified as gateways into the area. The last was identified as blighted and slated for redevelopment as part of Project Area 5. These properties are all part of the Agency's efforts with the Amargosa Redevelopment Project, the City's Amargosa Creek Specific Plan, and the Economic Development Strategic Plan for revitalizing commerce.

Goals and Accomplishments

The Amargosa Redevelopment Project Plan was approved by Ordinance 321 on October 17, 1983. The Lancaster Amargosa Redevelopment Project is an industrial/commercial and residential redevelopment effort focusing on a portion of the City found to be in a state of physical, social and economic blight. Current land use is a mix of commercial, industrial, and vacant properties. The proposed redevelopment of the Project Area would be centered on the elimination of blight. The Agency proposed to eliminate and prevent the spread of blight in the project area by:

- (1) Installation, construction, reconstruction, redesign, or reuse of streets, utilities, curbs, gutters, sidewalks and other public improvements;
- (2) Disposition of property acquired for uses in accordance with the Amargosa Redevelopment Project Plan;

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

- (3) Redevelopment of land by private enterprise or public agencies for uses in accordance with this Plan;
- (4) Financing of the construction of residential, commercial, and industrial buildings and the permanent mortgage financing of residential, commercial, and industrial buildings, as permitted by applicable State and local laws, to increase the residential, commercial, and industrial base of the City and the number of temporary and permanent jobs within the City;
- (5) In appropriate cases, rehabilitation of structures and improvements or development of vacant land by present owners, their successors and the government entities for uses in accordance with the Amargosa Redevelopment Project Plan.

All of the foregoing efforts would serve to increase property values and associated revenues to all taxing agencies.

Revitalizing Commerce

While core industry jobs in manufacturing, logistics, administrative and information services are the key to wealth creation, establishing a solid retail sector is critical to attracting the caliber of companies needed to foster a thriving local economy. The same residential growth that creates new challenges on Lancaster's job front also creates new opportunities in commerce. As new, higher-priced homes continue to attract more affluent consumers into the community, Lancaster's demographics are shifting. This increase in household income is anticipated to be the tipping point for a number of national retailers and restaurateurs to make their move to Lancaster.

Attracting new, upscale national brands and local merchants also complements job creation and workforce retention by creating the ambiance and lifestyle that quality firms and the next generation of rising stars expect to find near their workplaces. Today's young professionals look for a vibrant retail component as a sign of a community's overall vitality. While gauging a community's quality of life by the number of coffee houses, bookstores and bistros the City supports may seem somewhat superficial, the "Starbucks Test" is used by many to determine the suitability of a community for their generation. Many are attracted to a more urban and urbane downtown atmosphere where work, commerce and entertainment intertwine to create a vibrant cosmopolitan experience they often see in the media and seek to emulate in their own lives.

To date, Lancaster has not scored well with this metric. But times are changing. The new Lancaster Town Center in Amargosa has attracted a Panera Bread sandwich shop, a favorite among young professionals for its laid-back atmosphere and free Wi-Fi Internet access. New "lifestyle" centers on the City's west side hold significant promise since retail demographics are strongest in this area. Even the City's eastern edges are expanding with new residential growth. In order to maximize the value of Lancaster properties and, by extension, maximize their potential to generate revenue to the affected taxing agencies and the State, the City must seek appropriate opportunities in all new growth areas to establish retail centers to service these growing needs.

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

Accomplishments

The Agency's previous efforts in these project areas have not only fostered new development and created jobs, but also substantially increased property values. This history of success underscores the need to continue developing the remaining vacant parcels in these areas in order to maximize revenue to the taxing agencies. The Amargosa Creek Specific Plan offers a vision for the future of the 150-acre Amargosa Creek site, located between Avenues L and K-8 along 10th Street West. The Plan envisions a mixed-use site at the central Amargosa Creek location that will include office, retail, and major medical facilities, as well as the possibility of hotel and/or residential facilities. This component of the plan is called the Promenade at Amargosa Creek. Other features of the plan include plazas to facilitate an open-air dining/shopping/gathering experience, landscaping that both enhances the beauty of the area and serves as a screen from automobiles and certain areas, and methods to accommodate traffic and parking needs, among others.

In 2007, the city entered into an agreement with Kaiser Foundation Hospitals for the development of a medical office building and a hospital in Amargosa. One of the impediments to implementing this plan was the Amargosa Creek channel that ran directly through the site. Under the agreement, the City would construct the \$5.1 million drainage improvements in exchange for Kaiser's construction of a hospital.

This need had been emphasized by intense 100-year record storms during the winter of 2005-2006, as a result of which the City became aware that the volume of water flowing through Amargosa Creek was on the verge of exceeding the capacity of the existing channel. In 2009, improvements were completed on the \$12 million drainage channel, thus solving the drainage challenges while also enabling the future commercial development of the site. In 2012, Kaiser Permanente began construction on its new 130,000-square-foot medical office building on Avenue L and 5th Street West. Improving the drainage channel allowed for future development of a hospital and will also enable the development of the 10th Street West corridor in the Amargosa area. It is now expected that further development of the Amargosa Creek area will ensue in the coming years, thus dramatically increasing the value of the properties and, in turn, their ability to generate increased revenue to the taxing agencies on an ongoing basis.

Furthermore, the Lancaster Auto Mall is a critical component of the future of this site. Recently, three dealerships have expanded and a new Chevrolet dealership has moved in, leaving very little land for new dealers. This will force new dealerships, particularly upscale vehicle lines that are likely to be attracted by Lancaster's changing demographics, to look elsewhere. To avoid this problem, staff began looking at the Amargosa Creek area for additional space to maximize the Auto Mall's tax revenue generation potential. Because of the potential of a new regional commercial center, the 19-acre lot west of the Auto Mall and the 14 Freeway was considered for an expansion site.

Conclusion

The anticipated development of the parcels which comprise the Amargosa Creek site will maximize their tax revenue potential for the benefit of all concerned taxing entities. Because

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

property values are currently depressed, as demonstrated by the fact that the Auto Mall expansion site initially purchased by the Agency for \$5 million is now worth just \$2.5 million, allowing for the development of the site and the recovery of Lancaster's real estate market would yield the greatest financial benefit to the taxing agencies. Thus, consistent with ABx1 26 and AB 1484, H&S Section 34177 (e), to maximize the value of Agency property and, hence, future property tax revenues to affected taxing entities, the Oversight Board should allow the City to retain these properties for future development.

Lancaster Power Authority Solar Project

Recommendation

Transfer ownership to the City of Lancaster for continued development in order to satisfy an enforceable obligation of the Lancaster Redevelopment Agency according to H&S Section 34175.

Background

On June 28, 2011, the Lancaster Redevelopment Agency, Lancaster Power Authority, and the City of Lancaster entered into a binding agreement with US TOPCO ENERGY, INC. (TOPCO). The Agreement approved a Master Solar Power Purchase and Sale Agreement with TOPCO for construction of a 7.5-megawatt solar generation facility on City-owned land, including APN 3142-010-901.

Under this agreement, TOPCO would first utilize 3142-010-901 to construct a 7.5-megawatt solar generation facility. Upon completion of construction, TOPCO will provide the energy generated to Southern California Edison (SCE) under the California Renewable Energy Small Tariff (CREST) Program per their agreement with SCE. The photovoltaic energy system will contribute to a greener power grid, thus furthering the State of California's Renewable Portfolio Standard (RPS) goals. Parcel 3142-010-901 is an integral part of the Agency's obligation in this agreement and cannot be severed.

Conclusion

Selling the property to a third party is not a legally viable option due to the existing enforceable obligation with TOPCO. According to H&S Section 34175, properties identified as fulfilling an enforceable obligation shall be dealt with according to the agreement in place. The agreement calls for the City to retain ownership and therefore, according to H&S Section 34191.5 (c) (2), the property must be transferred to the City.

Front Row Center Development

Recommendation

Transfer ownership to the City of Lancaster for continued development, including construction of public improvements, attraction of regional retail establishments, job creation, and increased tax revenues. The continued development of Front Row Center will not only serve as a source of commercial activity and job creation for the Lancaster community, but also maximize the area's potential to create increased revenue to the taxing agencies. In the event the City were to determine that it will not retain the Front Row Center properties for future development, any sale would be brought back to the Oversight Board for approval.

Background

The Front Row Center Project Area serves as a practical location for future commercial development. However, the area requires constant attention by local government in order to maximize its potential for sales tax revenue generation and job creation. Market forces have led major anchors such as Costco, Home Base, Circuit City and others away from the area. Furthermore, the Lancaster Marketplace yields high vacancy rates and other small enterprises have been unsuccessful in the area. The Lancaster Redevelopment Agency acquired the land after developer Lancaster Landmark Properties decided not to utilize the area for a proposed shopping mall. Retention of the Front Row Center properties would allow for continued improvements to the area to attract new market activity in order to achieve the area's highest and best use, while also maximizing these properties' potential to generate new tax revenues for the affected taxing entities.

The Front Row Center Project Area was originally intended for residential purposes, as established in Specific Plan 80-01. However, rapid residential developments in other areas of Lancaster resulted in a reduced need for additional residential developments in this location. Thus, the City amended the General Plan (General Plan Amendment 87-03) to include more than 230 acres of commercial land. The recommendation in the November 9, 1987 staff report supported the commercialization of the Front Row Center Area.

The City of Lancaster stepped in to prepare the area for development by the private sector. The Redevelopment Agency entered negotiations with developer Signal Landmark to develop a shopping mall in Front Row Center; however, this project did not occur and the Redevelopment Agency reacquired the land. Since the acquisition of these parcels, there have been a number of successful developments with aid from the City and Agency. The Lancaster Municipal Stadium, a major Lancaster landmark which brings thousands of spectators to the area, was built in 1996. The City also attracted a Wal-Mart Supercenter, a regional marketplace. A Cinemark movie theater is located in the area, providing a major source of entertainment and revenue. In addition, Front Row Center is home to various retail stores, home furnishing and appliances, and eating and drinking establishments.

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

Front Row Center has prime potential for further development. Although the area has an abundance of vacant parcels at present, there is only one traditional full-service restaurant, which has been located in the area since before development first began in 1988. Front Row Center can and should be further developed to meet the demands of Lancaster residents and generate additional sales and property tax revenue.

Conclusion

The Front Row Center Development, aided by the resources of City government, has produced successful establishments and has been a significant source of revenue for the taxing agencies, including the State. However, due in part to economic conditions, private developers have lacked interest in Front Row Center in recent years, failing to capitalize on an exceptional area for commercial activity. The area possesses a variety of vacant parcels, and new national full-service food establishments have not settled in Front Row Center since the development of Black Angus in 1988. Additionally, the current state of the Lancaster real estate market would yield significantly decreased revenue to the taxing agencies if the property were sold prior to development and the market's recovery. Therefore, this area should be retained for continued maintenance and improvements in order to maximize its tax revenue generation potential.

Property for Resale

A consistent problem in the City of Lancaster is irregular parcelization. One method of parcel assembly is to trade property instead of cash. At times, property owners prefer to trade for another piece of property rather than selling for cash. Therefore, it was necessary for the Agency to retain vacant parcels for the purpose of swapping for site-specific properties for site assembly or public improvements.

However, because they are not implicitly tied to a redevelopment project, staff is recommending that these properties be sold and the proceeds be directed to offset obligations on the Recognized Obligation Payment Schedule as directed in the dissolution mandates, H&S Section 34191.5. (c) (2); 34175. (a).

LONG RANGE PROPERTY MANAGEMENT PLAN
For the Disposition of Real Property of the Lancaster Successor Agency
August 7, 2013

Asset Inventory/Tracking Worksheet

The following is the required asset inventory tracking worksheet for each of the properties transferred from the Former Agency to the Successor Agency. This inventory is organized to address the specific required inventory components listed in H&S Section 34191.5 (c) (1), with each item corresponding to the specific letter of the Code (e.g. item (A) provides the required information from H&S Section 34191.5(c)(1)(A) and so forth).
