915 L Street
Sacramento, CA  95814

WHO MAY APPLY:
Current state employees at the Staff Programmer Analyst (Specialist) levels, those within transfer range, or individuals who have list eligibility. Please indicate the basis of your eligibility (i.e. SROA, surplus, reemployment, reinstatement, transfer, or list eligible) on line 12 of the application.

Applications will be screened and only the most qualified will be scheduled for interviews. All appointments are subject to applicable personnel rules.

POSITION DESCRIPTION:
Seeking a self-motivated programmer to be part of a team to develop and maintain complex budget-related applications in a very congenial, fast-paced environment. This position involves working with modern Apple technologies and various open source tools to design and deploy Java web-based applications and maintain existing systems, and develops and support AppleScript applications to automate publications design workflow. The development environment is based on Eclipse IDE with Tomcat and WebObjects deployment on Mac OS X and Linux Servers.

DESERABLE QUALIFICATIONS:
• Ability to analyze user requirements and develop detailed program specifications
• Ability to write new and modify existing programs using Java programming language
• Ability to deploy code and verify implementation on Tomcat and WebObjects Application Servers
• Ability to install and configure WebObjects and Tomcat Application Servers in Mac OS X and Linux Server Environments
• Ability to write shell scripts and AppleScripts
• Experience in web based software development
• Experience working with relational databases
• Experience working as a project/team lead to develop and maintain complex systems
• Ability to communicate clearly and effectively, both verbally and in writing
• Ability to work productively with users, both independently and in a team environment and ability to work overtime on short notice during peak work period.
